Declaration of competing interest

The author declares no known competing financial interests or personal relationships that could have appeared to influence the work reported in this paper.

Funding

This research did not receive any specific grant from funding agencies in the public, commercial, or not-for-profit sectors.

CRediT authorship contribution statement

Nguyễn Nhật Thanh: Conceptualization, Methodology, Software, Validation, Formal analysis, Investigation, Data curation, Writing – original draft, Writing – review & editing, Visualization, Project administration.

Ethics approval

Not applicable. The study involves no human participants or animal subjects; the real-data case uses a public, anonymised retail dataset.

Data and code availability

The synthetic demand data are generated by the code. The real-data case uses the public FreshRetailNet-50K dataset (Wang et al., 2025; CC BY 4.0), which is downloaded from Hugging Face and processed by the code; no proprietary data are used. The code, configuration files, random seeds and result files that reproduce every table and figure are provided as supplementary material and will be made publicly available in a GitHub repository upon publication.

Declaration of generative AI and AI-assisted technologies in the manuscript preparation process

During the preparation of this work the author used Claude (Anthropic), through the Claude Code assistant, to help write and restructure the simulation and experiment code, run the experiments, and draft and edit the text. After using this tool, the author reviewed and edited the content as needed and takes full responsibility for the content of the published article.
